NEW CAPABILITIES AND MACHINES FROM RELIABLE METALCRAFT

Reliable Metalcraft Corporation announces the recent addition of tool & die, engineering and design capabilities to help develop new products and concepts for its clients. These new capabilities will allow Reliable Metalcraft to better meet the needs of customers for unique specifications and custom metal stampings.

The company has also added CNC milling, CNC lathes and Wire EDM machines. Specializing in precision metal stampings with Multi-Slide®, Four-Slide and Punch Press machines, the new machines offer expanded production capabilities for Reliable Metalcraft and its

customers. “These new capabilities and machines deepen our ability to serve our customers when tight tolerances and precision are required,” said Scott Chakan, President of Reliable Metalcraft.

Metal stampings from Reliable Metalcraft Corporation are custom manufactured to meet customer requirements. Specializing in manufacturing small precision metal stampings, Reliable Metalcraft is able to supply metal stampings from prototypes and short runs to millions of parts. Reliable Metalcraft’s custom and precision metal stampings are produced and used worldwide for automotive, electronic, plastic, medical, electrical, recreation vehicle, appliance and houseware industries.
